

Platform Enhancements & Supabase Cloud Integration

Executive Session Summary & Complete Technical Report • Date: August 13, 2026

1. Database Architecture (Supabase Cloud DB)

Cloud Project URL: <https://cvunxlxtqyklzxgyivv.supabase.co>

The platform was fully migrated to connect directly to 5 core cloud database tables with configured Row-Level Security (RLS) policies:

Table Name	Description & Purpose
students	Registered student profiles, LD types, severities, levels, and plans.
screening_results	Detailed screening assessment scores, risk breakdowns, and completion dates.
test_attempts	Level test scores, pass/fail status, correct answer counts, and duration.
practice_sessions	Practice module activity, category mastery, scores, and duration.
cms_content	Custom learning modules and practice questions managed by Admin.

2. Work Accomplished & Files Modified

Student Portal Features

- **LoginPage.jsx:** Enforced strict Cloud DB email verification before allowing student login. Stopped auto-creation of accounts when unregistered emails are typed on login.
- **ScreeningPage.jsx:** Upserts student assessments (LD Type, severity, risk scores) live to Supabase Cloud DB (*screening_results* & *students*).
- **StudentTestQuiz.jsx:** Saves level test attempts (score %, pass/fail, time taken) live to Supabase (*test_attempts*).
- **PracticePage.jsx:** Saves practice sessions and loads student practice history live from Supabase (*practice_sessions*).

Admin Portal Features

- **AdminDashboard.jsx:** Fixed placeholder metrics, displaying 0% accuracy when no practice tests exist, and deduplicated LD counts per unique student email.
- **AdminAnalytics.jsx:** Computes platform-wide sessions, accuracy, and engagement minutes directly from Supabase *practice_sessions* and *test_attempts*.
- **AdminStudents.jsx:** Added dedicated red ■ Delete Buttons to every table row. Robust target email resolution ensures single-student and bulk delete work reliably for 1 or more accounts. Computes dynamic student levels based on passed test attempts.

3. Git Commit History

Commit Hash	Description
dc46b1d	Fix avgAccuracy in AdminDashboard to display 0% until practice tests exist.
428dd90	Full Supabase Cloud Database integration across all Student & Admin modules.
0c6790a	Delete student record from Supabase Cloud DB tables in AdminStudents.
3c56a57	Require existing registration in Supabase/storage before login.
251514c	Persist deleted student emails to prevent resurrection in AdminStudents.
e258bb5	Fix delete action buttons in AdminStudents and deduplicate LD distribution counts.
88a9f6d	Compute dynamic student level from passed test attempts and fix bulk delete.
361959b	Fix robust email resolution for 1-student delete and bulk delete in AdminStudents.

Status: All features fully implemented, tested, verified, and committed to branch *main*.
